Glazed Shopfront Facades

Aluminium Shopfronts

Robust, traditional and versatile, aluminium shopfronts can give clients a large range of flexibility on the variety of window options to suit every purpose; whether it be high street retail shops to commercial entrances or shopping centres.

Aluminium is very durable, lightweight, high strength and is highly resistant to corrosion caused by industrial pollutants. Each shopfront is built to specification and can be glazed with a variety of different glass types, which ranges from laminated safety glass, toughened, tinted glass varieties and double-glazed units.

Glazed Shopfront Facades

Toughened Glass Frameless Shopfronts

Growing rapidly in popularity toughened glass (frameless) shopfronts brings the modern character to your business. Toughened glass doors can be installed with rails and/or patch fittings available in a variety of stainless finishes (satin/polished stainless steel, powder coated, anodised) with ornamental door handles to match.

Essential Glass shopfronts provide premium grade frameless toughened glass fronts and our pioneering products have led us to extend our range and provide clarity of vision, security and elegance coupled with our wide range of accompanying doors bespoke to each shop front.

Sliding Door Systems

In the modern workplace we can see automatic doors within office entrances, hotels, railway stations, retail outlets and many more. We supply and fit these mechanisms within our aluminium and glass shopfronts with a range of programmable settings to suit every environment.

An extremely versatile system that allows a single entrance door to slide either to the left or right, bi-parting pairs of doors to open simultaneously or pivoting doors to swing open when motion sensor or push pad is activated.

Aluminium Curtain Walling

Essential Glass aluminium curtain walling systems provide the perfect solution for the external façade of any building, maximising natural light while creating the feeling of space and never compromising the safety, security or comfort levels.

Our aluminium curtain walling systems offer both single and double-glazed options and is suitable for new build and refurbishment/refit projects giving clients, architects and specifiers flexibility in design, appearance and construction.

Internal Partitions

Single glazed partitioning provides a high quality, low cost solution to space division for office and home, creating private rooms within an open feel whilst letting natural light flood into the area. Single glazed partitioning can achieve an acoustic performance of up to 50dB to create a spacious and airy environment in which to work without disruption.
