

ESSENTIAL DESIGN GROUP

GLASS
RESIDENTIAL

Bi-Fold Doors

Bi Fold Doors create an open and spacious feel to your home, linking rooms together or creating a seamless transition between your garden and home. Transform any room with a large opening allowing light to flood in, creating an illusion of extra space.

The individual panels glide quietly and smoothly inwards or outwards, stacking to the left or right, and are available in many configurations up to 6m wide.

Patio Doors / French Doors

Patio doors, which slide along a track, and French doors, which open outwards on a hinge, are a wonderful way to open up your home, letting in both light and fresh air.

Both styles of doors help to bring the outside in, joining your living and outside space effortlessly, creating an area where you will want to spend more time. With a modern appearance and a choice of frame colours, we can flood your room with natural light.

Glass Balconies

All of Essential Design Group's balconies can produce valuable additional outdoor living space and are available in a range of sizes and aesthetics to suit any project's requirements.

All of Essential Design Group balcony structures are designed in-house, so whether you're looking for a simple or elaborate balcony we can make it for you with styles to suit all preferences.

Juliet Balconies

Juliet balconies are an increasing popular way of adding light and ventilation to any room, without having to make any structural changes to the building, as well as providing a guard or security barrier and creating a distinctive feature to your property. We offer a number of design options with our Juliet balconies which can be powder-coated to match the aesthetics of the existing façade.

Glass Balustrades

Glass Balustrades are ideal for creating a feature to balconies, stairways, patios and terrace areas. We have a variety of systems available for you whether you require a balustrade for safety or visual reasons our in house team are happy to discuss internal or external options.

Available with or without handrail, these glass balustrades can either be base fixed or side fixed depending on your individual preference subject to structural fixing requirements.

Glazed Rooflights

We can manufacture fixed roof lights in any shape or size, using single or dual colour framing, with the latest energy saving glazing panels to meet your design requirements. Create a wonderful sense of space by maximising light from above and giving a view of the sky all day long.

Glazed Canopies

A glass canopy provides reliable overhead protection from the elements, for a patio, terrace or entrance. Spend pleasant evenings in the open air, or have a barbecue with friends and neighbours. Our low maintenance contemporary canopies add a sleek look to your building and allow you to use your outside space more effectively for years to come.
